

Team Name: GUO

Members (and uni): Ahmed Alzubairi (afa2135), Michael Stone (ms5512), Mauricio Antonio Quintanilla (maq2119), Christian Kowalczyk (cjk2159)

part 1: The date and time at which you already completed this demo, and briefly describe any challenges that arose during the demo.

Our demo occurred during class on Thursday 11/19 at ~10:10 am.

The actual application worked exactly how we expected, but we should have rehearsed the presentation to make the handoff and speaking portion more seamless. We should have a better anecdote/explanation of the motivation for our app in the beginning. Also, we became aware of some obvious changes we need to make like ensuring that Zoom Link sent in email is valid.

part 2: A link to the github repository where your entire codebase resides. Tag which file revisions were shown in the demo.

We released version 1.0.0 for displaying the demo. You can see that version by clicking the version in our main github page or in this link:

<https://github.com/AhmedAlzubairi1/GUO/releases/tag/1.0.0>

part 3: A link to the folder in your repository that includes all your prose submissions thus far for this course.
